

Castle Wall Freeform Sample

Here's a sketch drawing from a user looking into the option of creating a physical product. The idea is to create a modular castle playhouse, with the option of drawing the corrugated sheets directly.

This was able to be done totally with freeform (giving the drawing "CastleWall.qid"):

A series of video tutorials was created to show the steps to create this, using a variety of freeform editing methods to illustrate various capabilities of freeform editing in the software.
